## GET Request

The screenshot shows the Thunder Client interface. The top bar indicates the current request is 'GET http://localhost:8080/api/v1/users'. The status bar shows 'Status: 200 OK', 'Size: 82 Bytes', and 'Time: 42 ms'. The 'Response' tab is selected, displaying the following JSON content:

```
1 {
2   "userId": 1,
3   "userName": "Aditi",
4   "phoneNumber": "7839372625",
5   "email": "xyz@gmail.com"
6 }
```

The left sidebar shows a list of requests, with the current request highlighted. The bottom status bar shows '2 Active' and '0' for other metrics.

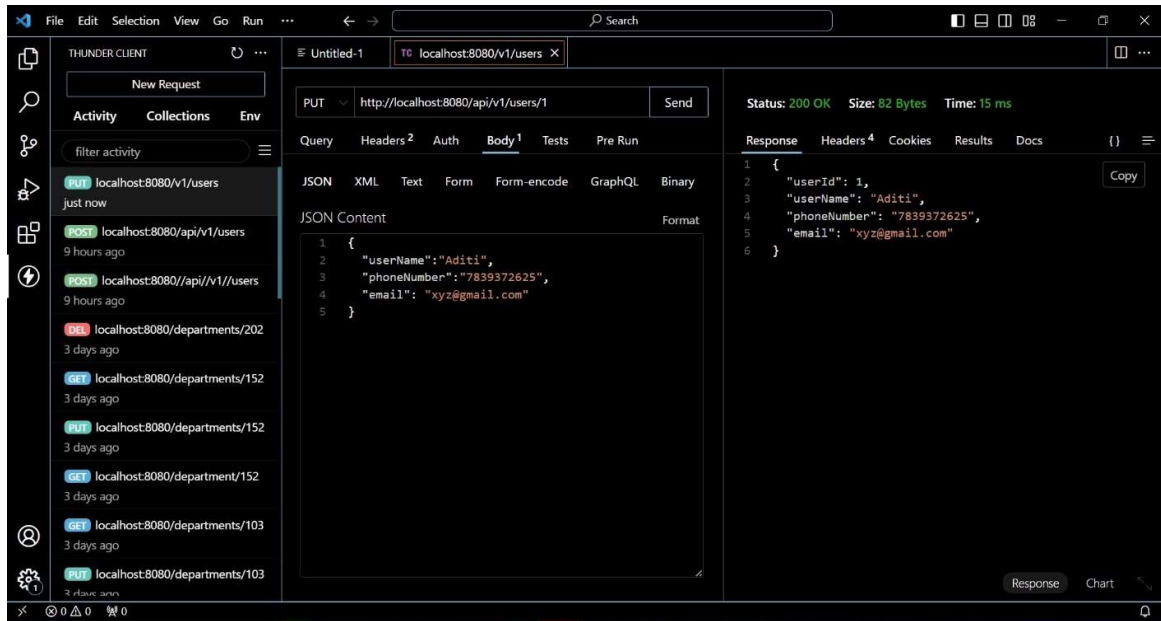

## POST Test

The screenshot shows the Thunder Client interface. The top bar indicates the current request is 'POST http://localhost:8080/api/v1/users'. The status bar shows 'Status: 200 OK', 'Size: 82 Bytes', and 'Time: 269 ms'. The 'Response' tab is selected, displaying the following JSON content:

```
1 {
2   "userId": 1,
3   "userName": "Aditi",
4   "phoneNumber": "7839372625",
5   "email": "xyz@gmail.com"
6 }
```

The left sidebar shows a list of requests, with the current request highlighted. The bottom status bar shows '2 Active' and '0' for other metrics.
